

# Improving Asset Utilisation: Six Steps You Need To Take

With more than 30 years fleet management expertise across all industry sectors, Hitachi Capital Vehicle Solutions is the perfect partner to guide your journey to optimum asset utilisation. We'll help you make informed decisions, taking the right steps at the right time, as we work together to implement a comprehensive strategy that's designed to reduce the cost, carbon, and risk of business mobility.

## 1 Understand Current Utilisation Rates

Start with a clear understanding of when, how and why vehicles are being used.

## 3 Set Clear Targets

Agree achievable goals with all stakeholders and publish these across the business.

## 5 Gain A Consensus

Gaining positive buy-in to your plan can make a big difference to the results achieved.

## 2 Identify Asset Utilisation Barriers

Compile a list of factors having a negative impact on asset utilisation.

## 4 Create An Actionable Plan

Agree an action plan with clearly defined roles, responsibilities, and timings

## 6 Monitor Your Results

Ongoing measurement ensures the right actions continue to be taken at the right time
